- Educational Institutions
- Courthouses – Institutional
- Correctional Facilities
- Military Facilities
- Convention & Sports Facilities
- Office & Retail Buildings
- Casino Resorts
- High Rise Hotels & Condominiums

In today's complex construction market, projects are increasingly vulnerable to delays, increased costs and project schedules that are no longer achievable. Resolving issues as they occur rather than later when they've escalated into a far larger and more costly problem at the end of the project reduces your risks. To meet these ever growing challenges, C.E. Support & Associates, Inc. was formed in 1999 by its founder, Michael J. Westrich, a civil engineer with twenty-five years of construction experience. Our firm's seasoned construction professionals, enhanced with analytical and practical field experience, help you simplify complex construction issues to reduce unforeseen financial exposure. In doing so, we create a "Win-Win" relationship that yields a mutually beneficial outcome for all parties.

## HOW WE CAN HELP

### SCHEDULING & COST CONTROL

Time is money and lost time equates to lost profits. Both increase your risks on a project. To avoid this common pitfall, we assist the client in developing sound CPM schedules, which are claim preventive and structured to achieve the objectives of time control in the project.

### DISPUTE RESOLUTION & LITIGATION SUPPORT

Disputes rob projects of the ability to be completed in a timely and economic manner. If involved in a dispute, you need to know quickly your vulnerability. We assist our clients, in this regard, with the successful negotiations of disputes that include expert analyses and testimony.

### CONTRACT RISK MANAGEMENT & SURETY FORENSIC INVESTIGATION

A thorough understanding of your rights under the contract is vital to effective project management. We advise our clients accordingly so that you can implement effective controls and significantly reduce your risks during construction. When problems arise we are there to help.

### PROJECT MANAGEMENT

The root cause of why projects often go awry is due to substandard project management. This results in the project being vulnerable to lost profits. To safeguard your projects, we assist the client in providing "scoop to nuts" project management through the engagement of our seasoned construction professionals.
